Didier Sauvage
CTO & Executive V.P. Marketing

Didier Sauvage is an engineering physicist with a degree from the Institut National Polytechnique de Grenoble (I.N.P.G.). He also holds an advanced degree in crystallography and an engineering doctorate in electronics. In 1981, he joined Alcatel-CIT as an engineer. In 1988, he joined Alcatel CIT as the Quality Director for the Components Division, which became Alcatel Optronics in 1994. In 1996, he was put in charge of Alcatel Optronics' Research and Development department, which expanded beginning in 2000 to include R&D centers in the USA, Canada, and Scotland. In 2003, he was put in charge of the Development Department at Avanex France, in 2004 he took over the Operations Department, and in 2005 became the Site Director of Avanex France. In 2007, he partnered with Alexandre Krivine to create 3S PHOTONICS.
