

Transmission Laser Modules

Key Features

Up to 30mW output power

Wavelength selection according to ITU-T G.692 from 1529.55 nm to 1569.59 nm

50 GHz channel spacing available

Optimized for use with LiNbO₃ external modulator

Polarization Maintaining Fiber pigtail

RIN -140 dB/Hz

Industry standard hermetic 14-pin butterfly package

InGaAsP Distributed FeedBack (DFB) SLMQW in-house laser

Applications

Ultra Long Haul 10 Gbit/s synchronous digital transmission systems

WDM submarine terminal digital transmission systems

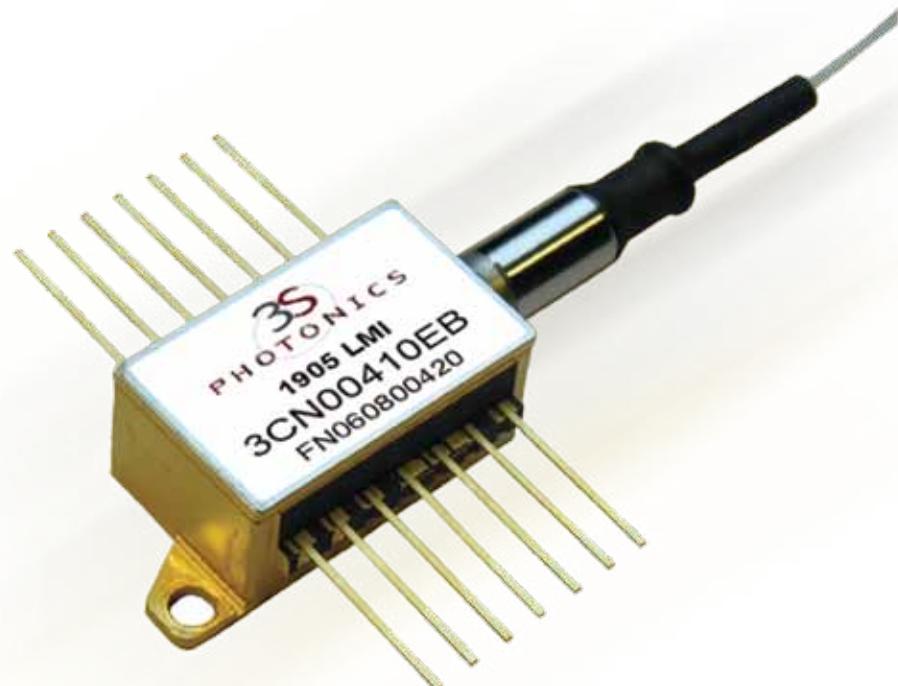

Instrumentation

1905 LMI

Up to 30mW WDM C-band version for external modulation CW 1.55μm Laser Module with optical Isolator

This laser module contains a 3SP Group SLMQW DFB laser and is designed for use with external modulation optimized for high power Wavelength Division Multiplexed (WDM) systems.

The module incorporates a polarization maintaining fiber pigtail, thermoelectric cooler, precision thermistor, and optical isolator for stable operation under all conditions.

OPTICAL CHARACTERISTICS

All limits start of life (except I_t , V_t), $T_{submount}=25^\circ\text{C}$, $T_c=25^\circ\text{C}$, $P_f, V=-5\text{V}$, unless otherwise stated.

| Parameters | Symb | Conditions | Min | Typical | Max | Units |
|--------------------------------------|------------------------------------|---|---------|---------|---------|-------|
| Operating case temperature | T_c | 10mW & 20mW | -5 | | 70 | °C |
| | | 30mW | -5 | | 65 | °C |
| Output power | P_f | $T_{wave}=20 \text{ to } 35^\circ\text{C}$ | 10 | | | mW |
| | | | 20 | | | mW |
| | | | 30 | | | mW |
| Threshold current | I_{th} | | | | 40 | mA |
| Forward voltage | V_f | P_f , pin 3 & 11 | | | 2.5 | V |
| Laser forward current | I_f | 10 mW, pin 3 & 11 | | | 100 | mA |
| | | 20 mW, pin 3 & 11 | | | 190 | mA |
| | | 30 mW, pin 3 & 11 | | | 260 | mA |
| Emission wavelength | λ | See table 3 | 1529.55 | | 1569.59 | nm |
| Δ (Emitted-Target) wavelength | $\Delta \lambda$ | @ T_{wave} , See table 3 for λ target | -0.1 | | +0.1 | nm |
| Submount temperature | T_{wave} | | 20 | | 35 | °C |
| Wavelength drift vs T_{wave} | $\Delta \lambda / \Delta T_{wave}$ | | 90 | | | pm/°C |
| Wavelength drift vs T_{case} | $\Delta \lambda / \Delta T_c$ | | 0.2 | | 0.5 | pm/°C |
| Spectral width | $\Delta \lambda$ | CW, P_f , -3 dB | | 2 | 5 | MHz |
| TE/TM extinction ratio | ER | | 17 | | | dB |
| Side mode suppression ratio | SMSR | P_f | 40 | | | dB |
| Relative intensity noise | RIN | 10MHz to 10GHz @ P_f | | | -140 | dB/Hz |
| Photodiode current | I_m | $V = -5\text{V}, @ 10\text{mW}$ | 0.1 | | 1 | mA |
| | | $V = -5\text{V}, @ 20\text{mW}$ | 0.2 | | 2 | mA |
| | | $V = -5\text{V}, @ 30\text{mW}$ | 0.3 | | 3 | mA |
| Photodiode dark current | I_d | $V = -5\text{V}$ | | | 0.1 | µA |
| TEC current | I_t | See note 1 | | | 0.85 | A |
| TEC voltage | V_t | See note 1 | | | 1.6 | V |
| Thermistor resistance | R_{th} | | 9.7 | | 10.3 | k Ω |
| Thermistor β constant | β | | 3800 | 3900 | 4000 | K |

Note 1 : $T_{case}=70^\circ\text{C}$ (10 and 20 mW), $T_{case}=65^\circ\text{C}$ (30 mW), $T_{submount}=20^\circ\text{C}$, @1.2 x P_f

Absolute Maximum Ratings

Stresses in excess of the absolute maximum ratings can cause permanent damage to the device.
These are absolute stress ratings only.

| Parameters | Min | Max | Unit |
|--------------------------------|-----|-----|------|
| Operating case temperature | -10 | 70 | °C |
| Storage temperature | -40 | 85 | °C |
| Laser forward current | | 350 | mA |
| Laser reverse voltage | | 2 | V |
| Photodiode forward current | | 1 | mA |
| Photodiode reverse voltage | | 20 | V |
| TEC voltage | | 2.8 | V |
| TEC current | | 1.4 | A |
| Lead soldering time (at 260°C) | | 10 | s |
| Fiber bend radius | 30 | | mm |
| Packing mounting screw torque | | 0.2 | N.m |

Definitions

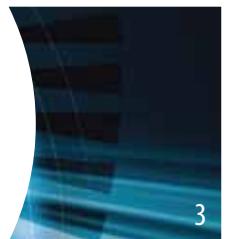

T_{wave} : T_{wave} is the submount temperature at which the laser emission wavelength reaches the target wavelength with an accuracy of better than: $\lambda_{target} \pm 0.1\text{nm}$. This temperature is calculated during manufacturing according to: $T_{wave}=25^\circ\text{C} + (1/C) * (\lambda_{target} - \lambda_{25^\circ\text{C}})$, where C is the laser wavelength drift with temperature (in nm/°C).

Emitted wavelength drift vs T_{case} : absolute value of maximum emitted wavelength deviation per unit of case temperature (°C) when T_{case} varies from min to max operating conditions. Wavelength is stabilized through the thermal regulation of the laser chip based on the thermistor reading.

Emitted wavelength drift vs T_{wave} : Maximum emitted wavelength deviation per unit of submount temperature (°C) when $T_{submount}$ varies from min to max conditions. Wavelength is stabilized through the thermal regulation of the laser chip based on the thermistor reading.

4

Shipment **packing**

Each device is individually packed in an anti-static container and in such a manner as to prevent damage in transit.

The packing shall include the following information:

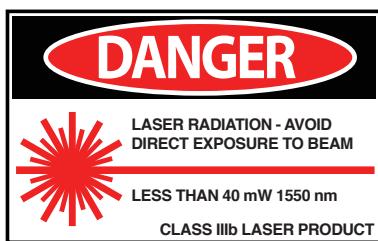

1. 3S Photonics logo
2. Product family name: 1905 LMI
3. Product code: 3CN number (see Ordering Information section)
4. Serial number
5. Hazard warning label (ESD)
6. Laser Safety Class Label

Laser Safety **Information**

Take appropriate precautions to prevent undue exposure to naked eye.

This product is classified Class 1M Laser Product according to IEC-60825-1: edition2.

All versions are Class IIIB laser products per 21 CFR 1040-10 Laser. Safety requirements under accession number 0120546-00.

Qualification, Reliability and **Standards**

3SPGroup handling policy for all products is to carry out a complete qualification program. This qualification is based on manufacturers qualification in agreement with Telcordia GR-468-Core (generic reliability assurance requirements for optoelectronic devices used in Telecommunications equipment - central office level), MIL STD 883E (Test method and procedures for microelectronics) and following the standards ITU-T G652 and G-691. All products pass strict tests before shipping. Failure criteria are defined during the product qualification process.

Device **marking**

The device shall be legibly and permanently marked with the following information:

1. 3S Photonics logo
2. Product family name: 1905 LMI
3. Product code: 3CN number (see Ordering Information section)
4. Serial number

Deliverable **data**

The following data shall be supplied with each device :

1. L(I)/V(I) curves @ Tc/Tsubmount= 25°C/25°C
2. It, Vt @ Tc/Tsubmount=25°C/70°C, Pf
3. Values of Twave and RTH @ Tsubmount=Twave
4. Values of If, Im, Ith and external differential efficiency @ Tsubmount=Twave and Pf
5. I and SMSR at Tc= Tsubmount= 25°C

Product testing shall be carried out at a level that ensures conformity to the customer specification

Handling

This product is sensitive to electrostatic discharge and should not be handled except at a static free workstation. Take precautions to prevent ESD; use wrist straps, grounded work surfaces and recognized anti-static techniques when handling the product. Handle the laser module by its package only. Care should be taken to avoid supply transient and over voltage.

Over voltage above the maximum specified in absolute maximum rating section may cause permanent damage to the device.
