

Transmission Laser Modules

KeyFeatures

InGaAsP monolithically integrated DFB laser and modulator in-house chip

Low drive voltage (≤ 2 Vpp)

Very low dispersion penalty up to 750 km for 2.7 Gbit/s operation (up to 12800 ps/nm)

Based on XMD MSA package product platform (size & pinout)

Leads for electrical connections

High output power [0;+4] dBm configuration

Wavelength selection according to ITU-T G.692

RoHs Compliant

Applications

Regional Metro D-WDM line card size and cost optimization

STM-16 and OC-48 size optimized Transmitter and Transceiver modules

Replacement of 14 pin-butterfly EML module

1926 LMM

TOSA – 2.5 Gb/s Electro-Absorption Laser Module WDM – 12800 and 7200 ps/nm application – Pigtail

This 1926 LMM contains a 3SPGroup DFB laser with monolithically integrated electro-absorption modulator.

The modulation voltage is applied to the modulator section while the DFB laser operates CW. Without the complexity of LiNbO3 external modulators, the 1926 LMM is dedicated to STM16 / OC-48 bit rate with reduced size and cost. This device allows 2.5Gbit/s data transmission with an extinction ratio higher than 10.5dB and less than 2V modulation voltage.

The 1926 LMM is optimized for up to 2.7Gbit/s WDM transmission systems supporting dispersion up to 12800ps/nm.

1926 LMM

Shipment **packing**

Each device is individually packed in an anti-static container and in such a manner as to prevent damage in transit.

The packing shall include the following information:

3S Photonics logo
Product family name : 1926 LMM
Product code : 3CN number (see Ordering information section)
Serial number
Hazard warning label (ESD)
Laser Safety Class Label

Laser Safety **Information**

Take appropriate precautions to prevent undue exposure to naked eye. This product is classified Class 1M Laser Product according to IEC-60825-1: edition2.

All versions are Class IIIB laser products per 21 CFR 1040-10 Laser. Safety requirements under accession number 0120546-00.

Deliverable **data**

The following data shall be supplied with each device:

L(I) / V(I) / Im(I) curves

Values for Vmod, Von (On-state voltage [0 data]), Vbias (bias voltage), DER, S0 (received optical power without fiber), DS and Pave for If

DER and dispersion penalty (DS)

Plot of SER vs Vmod over the range 0 V to -3 V @ If, Twave and Tc= 25 °C

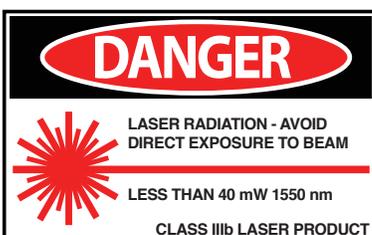

Handling

This product is sensitive to electrostatic discharge and should not be handled except at a static free workstation.

Take precautions to prevent ESD; use wrist straps, grounded work surfaces and recognized anti-static techniques when handling the product.

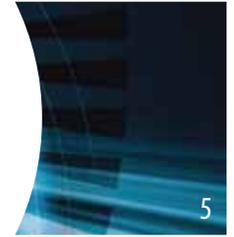

Handle the laser module by its package only, never hold it by its pigtail.

Care should be taken to avoid supply transient and over voltage. Over voltage above the maximum specified in absolute maximum rating section may cause permanent damage to the device.
